## CAREER SUMMARY:

Seasoned software developer with around 2 years of experience in building and optimizing web applications. Proficient in a variety of frameworks and committed to best practices and efficient coding.

## WORK EXPERIENCE:

### Moneytor ( September, 2022 - October, 2023 )

- Revitalized the frontend of our loan settlement website, significantly simplifying the process for users to access loan information and make repayments. This innovation led to a substantial increase, with approximately **1,500 additional loan repayments** per month.
- Engineered advanced features for **bulk messaging via WhatsApp**, integrating **Socket.io** and **Firebase** for efficient notification delivery. These features keep our customers informed about special offers, directly contributing to improved client engagement.
- Implemented **AuthGuard** in Angular to fortify the security of login-based pages, ensuring robust access control and protecting sensitive user data.
- Actively involved in the development of two upcoming mobile-only platforms, **DripMoney** and **MoneytorCare** set to enhance our service offerings. Note: These are mobile-only sites
- Authored a suite of backend APIs focusing on **CRUD operations**, leveraging Node.js to ensure smooth, efficient data management and application functionality.

### Codevision technologies ( November, 2021 - July, 2022 )

- Played a key role in the frontend development of a dynamic payment application, enhancing user experience and transaction efficiency.
- Worked on the frontend of a variety of different projects in **React**, While ensuring that the best practices are followed. (**Proper folder structure, informative code comments, State management, Lifecycle methods** etc.)
- Authored optimized and efficient code, utilizing the latest **ES6** features and adhering to the **DRY** (Don't Repeat Yourself) coding principle for enhanced maintainability and performance.
- Demonstrated expertise in crafting interactive user interfaces employing **HTML, SCSS, JavaScript**, and jQuery, contributing to engaging and responsive designs.
- Developed a comprehensive childcare website for a U.S.-based client by customizing the **WordPress 2021 theme**. This project showcased my ability to tailor solutions to specific client needs. Kidos Academy

## TECHNOLOGIES AND FRAMEWORKS

Html | Scss | **Angular** | React | **JavaScript** | Material UI | Bootstrap | **Node.js** | Mysql | **Express.js** | Sequelize

## SKILLS:

- Experience with Angular web and mobile development
- Proficient in JavaScript and TypeScript.
- **Googling**

## EDUCATION:

- **Jai narayan vyas university | 2018 - 2021**
  Bachelor of Computer Applcations
- **Shree swaminarayan vidhyalay | 2016 - 2018**
  XII (Gseb)

## HOBBIES:

Travelling, Book reading , Binge watching, Cooking.
